📍 Kizhakkeparambil House, Kudayathoor P.O, Kudayathoor, Thodupuzha, Idukki – 685590, Kerala, India

Work Experience: 5 Yrs Node.js | 2 Yrs React.js Current Location: Thiruvananthapuram

Professional Summary

Backend-focused Full Stack Developer with 5 years of experience building scalable web applications, REST APIs, and microservices using Node.js, Express.js, TypeScript, MongoDB, Redis, RabbitMQ, and SQL databases. Also experienced in React.js frontend development. Skilled in AWS, Azure, Docker, CI/CD, and performance optimization with a strong focus on scalable backend architecture.

Technical Skills

Languages: JavaScript, TypeScript, PHP, SQL

Backend: Node.js, Express.js, REST APIs, GraphQL, Microservices, RabbitMQ, Kafka

Frontend: React.js, HTML5, CSS3, jQuery

Cloud & DevOps: AWS, Azure, Docker, CI/CD, Git

CI/CD Tools: GitHub Actions, Jenkins

Databases & Caching: PostgreSQL, MySQL, SQL Server, MongoDB, Redis

Work Experience

1. Spericorn Technology Pvt. Ltd, Trivandrum — Software Engineer (Aug 2025 – May 2026)

Job Profile - Engineered scalable backend systems using Node.js, optimized for cloud environments. Collaborated closely with product and design teams to deliver high-impact, client-driven features. Acted as Team Lead, guiding junior engineers, improving code quality, and strengthening development standards.

2. Qburst Technologies, Kochi — Lead Software Engineer (Jan 2020 – Aug 2025)

Job Profile - Developed scalable cloud-ready applications using Node.js and React.js. Built REST APIs and backend services for enterprise-grade applications. Collaborated with cross-functional teams to transform business requirements into technical solutions. Led engineering teams, mentored developers, and enforced coding standards and best practices. Contributed to application architecture, performance optimization, and cloud deployments.

3. Bridge Global, Kochi — Software Programmer (Jul 2017 – Jan 2020)

Job Profile - Developed high-performance PHP backend systems for scalable web applications. Focused on clean architecture, maintainability, and long-term application stability. Collaborated with development teams to enhance system efficiency and optimize backend workflows.

4. Agileblaze Technologies, Kochi — Software Programmer (Nov 2014 – May 2017)

Job Profile - Built dynamic and responsive web applications using PHP and jQuery. Developed user-friendly interfaces with a strong focus on performance and responsive design principles. Facilitated communication between clients and development teams to gather requirements and present customized web solutions, ensuring successful project delivery and client satisfaction.

5. ALT-D Technologies, Kochi — Junior Software Programmer (Jul 2013 – Nov 2014)

Job Profile - Developed and customized client-specific web applications using PHP and WordPress. Implemented CMS-based solutions tailored to business requirements. Assisted in maintaining and enhancing existing applications to improve functionality and usability.

Projects

1) LINE Marketing Campaign Tool

Tech Stack – React.js, Node.js, TypeScript, Azure Functions, SQL Server, Service Bus, Event Hub

Details - Built a marketing automation platform for the LINE ecosystem integrated with Salesforce Marketing Cloud. Developed campaign workflows for personalized messaging, audience segmentation, rich menu management, and performance tracking. Enabled real-time synchronization between LINE events and marketing systems.

2) Webhook-based Follow/Block Tracker

Tech Stack – Node.js, TypeScript, Azure Functions, Azure Event Hub

Details – Developed an event-driven platform to capture LINE follow/block events and sync audience data with Salesforce Marketing Cloud in real time. Automated Data Extension updates for accurate segmentation and personalized campaigns.

3) Ecommerce CMS Platform

Tech Stack – React.js, Node.js, TypeScript, MySQL, GraphQL, AWS, Docker

Details - Built a scalable CMS for a large e-commerce platform, enabling dynamic content management across web and mobile. Implemented multi-country, multi-brand, and multilingual capabilities with reusable content components.

4) MessageHub - Serverless Message & Click Tracking Platform

Tech Stack – React.js, Node.js, TypeScript, AWS Lambda, API Gateway, SES, SNS, SQS, DynamoDB, AWS SAM

Details - Designed a serverless messaging and click-tracking platform supporting high-volume campaign delivery and real-time analytics. Built event-driven workflows using Lambda, SNS, and SQS for scalable message processing, clickstream ingestion, and automated campaign reporting.

5) Account Platform Modernization & Architecture Revamp

Tech Stack – Node.js, Express.js, TypeScript, MySQL, AWS

Details – Led migration of a legacy PHP account platform to Node.js and TypeScript. Designed a modular architecture, reduced technical debt, and created reusable region-specific services to support multiple markets.

6) Private Credit Syndication Platform

Tech Stack – Node.js, Express.js, React.js, TypeScript, PostgreSQL, AWS, Terraform

Details – Developed a fintech platform for private credit syndication, supporting deal management, investor onboarding, capital allocation, repayment tracking, and third-party financing integrations.

7) SEO Analytics & Marketing Dashboard

Tech Stack – React.js, Node.js, TypeScript, Google APIs, PostgreSQL, AWS

Details – Developed a SaaS platform that unified SEO, Google Analytics, and Google Ads insights into a single dashboard. Built multi-project integrations, subscription management, and secure data synchronization to enable KPI tracking, customer onboarding, and scalable growth.

Education

BTech in Information Technology

MG University College of Engineering, Thodupuzha | 2008 – 2012 | 73.3%
